***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a polymerization utilizing particular catalysts and UV inhibitor classified in class 523 and 528, subclass 338+ and 283+.
- II. Claims 20-39, drawn to a polymerization utilizing a general UV inhibitor, classified in class 523, subclass 338+.
- III. Claims 40-58, drawn to a polyester having an UV inhibitor, classified in class 524 and 528, subclass 600+ and 272+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I (and II) and III are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by different processes such as the instant Group I or Group II.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because catalysts and UV inhibitor can be

other than those of Group I. The subcombination has separate utility such as polymerization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I or III is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Carmen on December 1, 2005 and left a message to request an oral election to the above restriction requirement, but did not result in an election being made as of December 8, 2005.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tae H. Yoon whose telephone number is (571) 272-1128. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone
